Preparation of this document was financed in part through funds made available by the New Mexico State Highway and Transportation Department in cooperation with the U.S. Department of Transportation Federal Highway Administration and Federal Transit Administration.

May 15, 2003

Dear Citizen,

Following a rigorous process of analysis, evaluation, and public involvement and discussion, the Mid-Region Council of Governments is pleased to present this document as the 2025 Metropolitan Transportation Plan (MTP) for the Albuquerque metropolitan planning area.

The purpose of the MTP is to evaluate what the transportation system is like now, examine where and how we're likely to grow as an area, and determine what our transportation system should look like in the future. As the metropolitan planning organization for the area, the Mid-Region Council of Governments (MRCOG) is responsible for developing a new MTP every three years.

The 2025 MTP identifies the transportation projects that are expected to be built between now and 2025, given the revenues we can reasonably expect at the Federal, State and local levels. Highlights of the 2025 MTP include:

- 133 additional miles in bicycle lanes
- Doubling of the number of miles of bicycle and pedestrian paths and trails
- Construction of the I-40/Coors interchange
- Increased funds for intelligent transportation system projects
- Extended transit service on Unser to McMahon, new service to Mesa del Sol, and more frequent trips on San Mateo, Isleta, 4th Street and Louisiana at Uptown
- Reconstruction of much of Interstate 25 and Interstate 40
- Additional lanes on I-25 between Tramway and the I-25/Bernalillo interchange

Development of this MTP ended with approval by the Metropolitan Transportation Board in early May 2003. However, transportation planning in the urban area is a continuous process. If you would like more information about specific projects, the transportation planning process or some aspect of the MTP itself, please do not hesitate to contact us.

Chris Blewett
Director of Transportation and Planning

MTP-Related Documents

Technical Documentation for the 2025 MTP

Provides detailed technical material related to the 2025 MTP development and analysis process.

Development and Review Process Supplement to the 2025 MTP

Describes the development process for the 2025 MTP and the public involvement process. Includes copies of public comments and letters of response.

Air Quality Conformity Analysis Supplement to the 2025 MTP

Detailed air quality conformity analysis for carbon monoxide for Bernalillo County maintenance area. Includes Mobile6 inputs and outputs.

2004—2009 Transportation Improvement Program

Provides summary tables and detailed information sheets for each TIP project. Will be updated throughout the year as modifications are made by the Metropolitan Transportation Board.

2025 MTP Executive Summary

An overview of the contents of the 2025 Metropolitan Transportation Plan.

Local Motion

Provides data and analysis about how the transportation system functioned in the previous calendar year and discusses the trends for key statistics.
